

NASAL ADMINISTRATION OF CALCIUM CHANNEL BLOCKERS FOR TREATMENT OF HYPERTENSION
AND OTHER CARDIOVASCULAR DISORDERS

ABSTRACT OF THE DISCLOSURE

Pharmaceutical compositions useful for the treatment of cardiovascular disorders such as hypertension are described. These compositions are formulated for nasal administration and comprise a therapeutically effective amount of a calcium channel blocker, optionally a pharmaceutically acceptable carrier that is suitable for nasal administration, and one or more optional members selected from excipients and additional pharmaceutically active agents.
